

Mollart Engineering (Chessington) Limited

5-Axis Setter / Operator

Industry: *Subcontract Precision Engineering (Oil and Gas, Nuclear, Automotive, Aerospace and General Engineering)*

Location: *Chessington, Surrey*

The Role

An opportunity has arisen for a 5-Axis Setter / Operator to join a long-established company with a world leading reputation for the provision of subcontract machining and assembly services and the manufacture of cutting tools.

Working within the company's Subcontract division the successful candidate will be part of a dynamic engineering team playing a key role in the drilling and manufacture of machined parts to the highest quality standards for a range of customers in sectors as diverse as oil and gas, nuclear, automotive, aerospace and general engineering.

This is an outstanding opportunity to become part of a growing division with opportunity for personal growth and responsibility.

Skills/Responsibilities:

The ideal candidate will be an apprentice trained or time served engineer educated to City & Guilds or BTEC level with relevant experience and a strong understanding of precision subcontract machining and engineering.

You must possess the ability to work with components and free issue material of varying qualities, using sophisticated machinery and standard measuring equipment, working to tight tolerances and appreciating the need to maintain a very high standard of workmanship.

Applicants must be able to work on their own with minimal supervision and accept some flexibility of working hours if required to meet customer deadlines. The individual must also be hard-working and extremely reliable, possess a proactive problem-solving approach and be a strong team player.

Key Responsibilities:

- Setting and Operating 5 axis machining centre, experienced with Mazak Integrex / DMG Mori.
- Producing precision components to engineering drawings and specifications.
- Performing in-process quality checks.
- Selecting and setting tooling and work holding equipment.
- Comply with relevant H&S requirements.
- Adhering and maintaining ISO 9001 and AS9100 standards throughout the process.

Requirements:

- Proven experience in Setting and Operating 5 Axis machines.
- Strong knowledge of programming software.
- Ability to read and interpret engineering drawings.
- Experience working to tight tolerances.
- Strong attention to detail and commitment to quality.
- Self-motivated with the ability to work independently.
-

The Package:

- Competitive Basic rate salary
- Scope for significant overtime
- Pension scheme
- Life Assurance
- Participation in company bonus scheme subject to qualifying period
- 38 hour working week, 12pm finish on a Friday
- 25 days holiday plus bank holidays
