

Mollart Engineering (Resolven) Limited

Quality Control Inspector Vacancy

Our growing company at Mollart Engineering Resolven, South Wales, is looking for a quality inspector. If you are looking for an exciting place to work, please take a look at the list of qualifications below. You will be required to work shifts and overtime when required.

Duties & Responsibilities

- Conduct inspection of machined parts, weldments, and assemblies as per customer's drawings, specifications, and requirements through the use of various types of inspection equipment and CMM operation.
- Initiate and follow up of Nonconformance as required.
- Assist with material movement as relates to non-conforming product.
- Verification of operator in-process checks.
- Special Projects as directed by quality management.
- Ability to work in a high-paced environment on multiple projects simultaneously (multitask) while maintaining high-levels of quality assurance practices.
- Maintains a clean work environment to eliminate potential product contamination and damage.
- Performing visual inspection checks on mechanical parts, weldments and various coatings and finishes (Anodising, Grit Blasting, Chromium Oxide).
- Inspection on electrical and mechanical components on incoming parts, material, in-process assemblies, and final product.
- Review material specification and test reports against specification requirements.
- Document inspection results in accordance with customers requirements and any additional work instructions.
- Vacuum Testing using Jigs and Fixtures.

Desired Experience:

- Ability to read engineering drawings, bill of materials, quality plans, and other documents as needed is a must.
- Ability to work under direct supervision and to follow written instructions and techniques.
- Ability to exhibit a keen perception in all areas of quality assurance.
- Be competent in the use of all metrology inspection and test equipment and CMM operation.
- Proven track record of the highest integrity level.
- Must be observant and good at paying attention to detail.
- Basic knowledge of Excel, MSOffice, and Outlook.
- Familiar with process control tools.
- Time served apprenticeship.
